EXECUTIVE SUMMARY

Defense contract spending varies enormously by state.¹ In fiscal 2014,² the Defense Department spent \$266 billion on unclassified defense contracts in the 50 states and the District of Columbia.³ The five highest-ranking states, Virginia, California, Texas, Maryland and Connecticut, have both major defense industrial centers and large military bases. Yet the impact of defense spending also depends on a state's size and its economic diversification. In Virginia, the state with the most defense contract spending in fiscal 2014, defense contract spending was about 7.6 percent of the state's Gross Domestic Product (GDP). California was second in defense contract spending at \$31.6 billion, yet defense contracting accounts for only 1.4 percent of its economy.

That ratio means California's \$2.3 trillion economy would be far more resilient in the face of planned reductions in defense spending—and less responsive to increases. Since the passage of the Budget Control Act of 2011, which reduced and capped defense spending, each year the president and Congress have struggled to find ways to spend more on their priorities, including defense. Every year, they have increased the spending caps, and the Pentagon's budget, by billions of dollars, yet budgets remain flat, receiving tens of billions of dollars less than requested.

Table 1: Top 10 States by Defense Contract Dollars in Fiscal 2014

Dollars in billions

Rank	State	Defense contract spending
1	Virginia	\$35.2
2	California	\$31.6
3	Texas	\$24.1
4	Maryland	\$13.7
5	Connecticut	\$13.2
6	Pennsylvania	\$10.3
7	Florida	\$10.0
8	Massachusetts	\$9.4
9	Alabama	\$8.8
10	Arizona	\$8.7

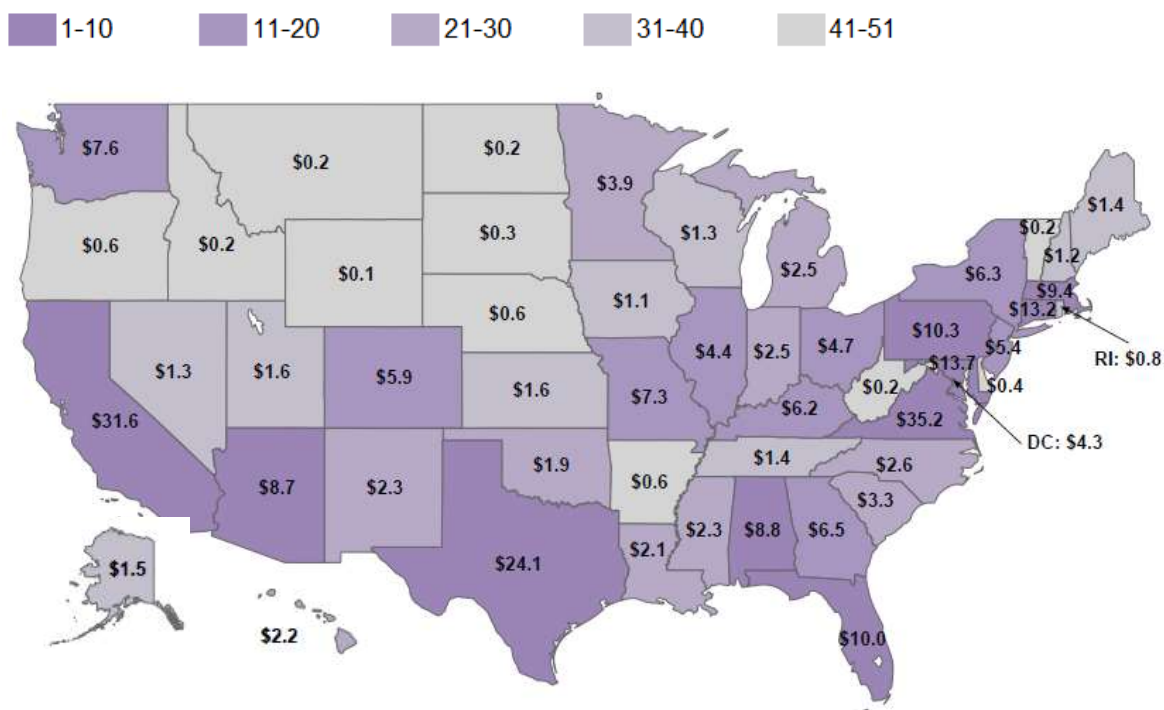

In fiscal 2014, defense spending in the top five states accounted for \$117.9 billion, or 44 percent of the \$266 billion in defense contract spending in the 50 states and the District of Columbia. The top 25 states accounted for almost 90 percent of all defense contracting. Yet those states are geographically diverse, stretching across the entire country.

¹ For this study, defense contract spending is defined as money obligated to contracts by the Defense Department, as reported to the Federal Procurement Data System. The data are cleaned by Bloomberg and put into a proprietary contracts database accessible through tools on bgov.com.

² The federal fiscal year 2014 ran from Oct. 1, 2013, through Sept. 30, 2014.

³ Figures don't include defense contract dollars spent outside the 50 states and the District of Columbia.

Chart 1: Ranking of Total Defense Contract Spending by State (in billions)

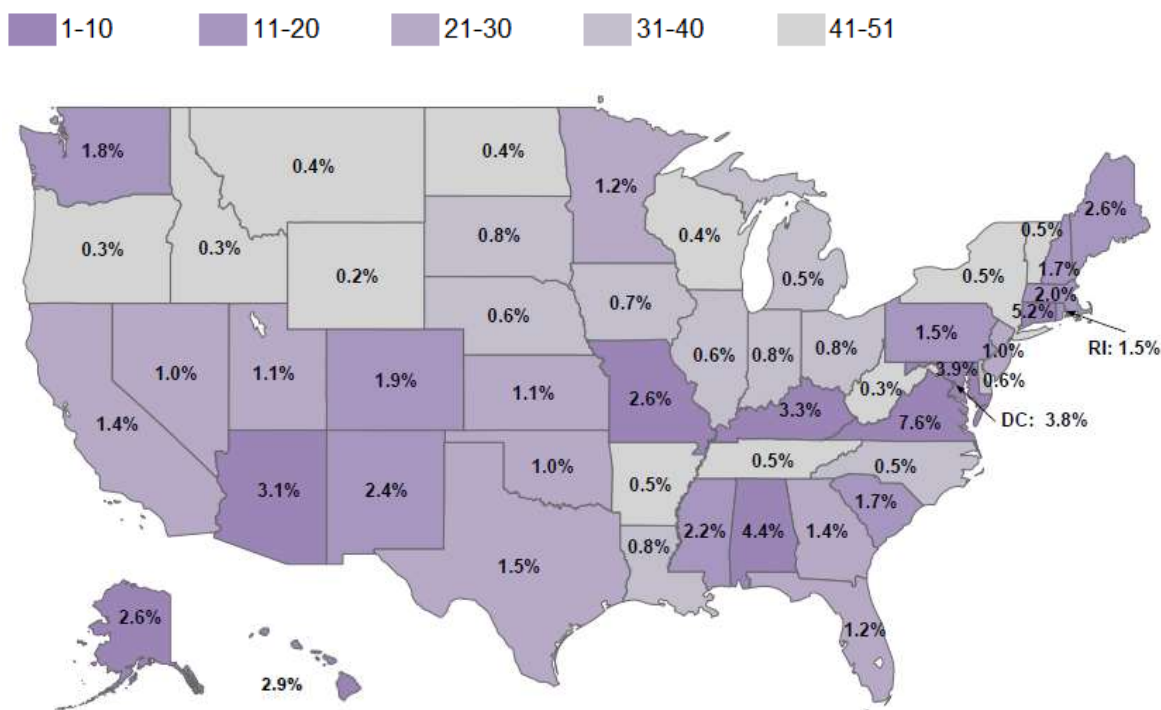

The Washington, D.C., metro area, including Virginia, Maryland and the District of Columbia, is one locus of defense spending. Fiscal 2014 defense contract spending in the District itself was \$4.3 billion, or 1.6 percent of all fiscal 2014 defense contract spending.

Table 2: Top 10 States by Defense Contract Spending as a Percentage of GDP

Rank	State	Percentage of state GDP
1	Virginia	7.6%
2	Connecticut	5.2%
3	Alabama	4.4%
4	Maryland	3.9%
5	District of Columbia	3.8%
6	Kentucky	3.3%
7	Arizona	3.1%
8	Hawaii	2.9%
9	Alaska	2.6%
10	Missouri	2.6%

Just as defense contract spending is distributed unevenly nationwide, it is also unevenly distributed within states, with some congressional districts receiving far more defense dollars than others. Not surprisingly, three of the top 10 congressional districts are in Virginia.

Chart 2: Ranking of Defense Contract Spending as a Share of State GDP

Virginia's 8th congressional district, represented by Democrat Don Beyer, garnered a whopping \$9.6 billion in defense contract dollars in fiscal 2014. That makes VA-8, which includes the Pentagon, the top defense contracting district in the country. Hewlett-Packard Co. was the top defense vendor in the 8th district, with more than half a billion dollars in contracted work in in fiscal 2014. In the state maps that follow, not all congressional districts are labeled when districts are small and close together.

Table 3: Ranking by Defense Contract Spending by Congressional District

Dollars in billions

Rank	District	Defense contracting
1	VA-08	\$9.6
2	VA-11	\$8.0
3	CT-02	\$7.1
4	TX-12	\$6.7
5	AI-05	\$6.1
6	VA-03	\$6.0
7	MO-01	\$5.8
8	MD-02	\$5.3
9	WA-09	\$5.2
10	CA-17	\$4.4

This BGOV study updates a report released on Nov. 17, 2011. That report looked at all defense spending—contracting and spending on military and civilian personnel for fiscal 2009.

Unfortunately, the Department of Defense no longer releases payroll information broken out by state. The current study examines only defense contract spending in the 50 states and the District of Columbia. The figures come from Bloomberg Government's proprietary contracts database. They are consistent with the BGOV200 list of top contractors for fiscal 2014.⁴

The location of the spending is based upon place of performance as reported to the U.S. government. For goods, the place of performance is where the good is produced. For services, the place of performance is where the service is performed.

The figures for state population and state GDP come from the U.S. Census Bureau. The figures on personnel for the top military installations in each state come from the Department of Defense's [2015 Base Structure Report](#). Bloomberg has corrected the names of the bases where appropriate.

⁴ The BGOV200 shows spending by contracting agency. This study shows spending by funding agency. The differences occur when an agency (the funding agency) uses another agency's contract (the contracting agency) to make purchases.

APPENDIX 1: STATES RANKED BY DEFENSE CONTRACTING AS A PERCENTAGE OF THEIR GDP

Rank	State	Percentage of state GDP
1	Virginia	7.59%
2	Connecticut	5.23%
3	Alabama	4.41%
4	Maryland	3.93%

51	Wyoming	\$0.1

HOW TO READ THIS STUDY

Every state's defense contract spending is broken out this way.

Alabama had \$8.8 billion in defense contract spending in fiscal 2014, the ninth most in the nation.

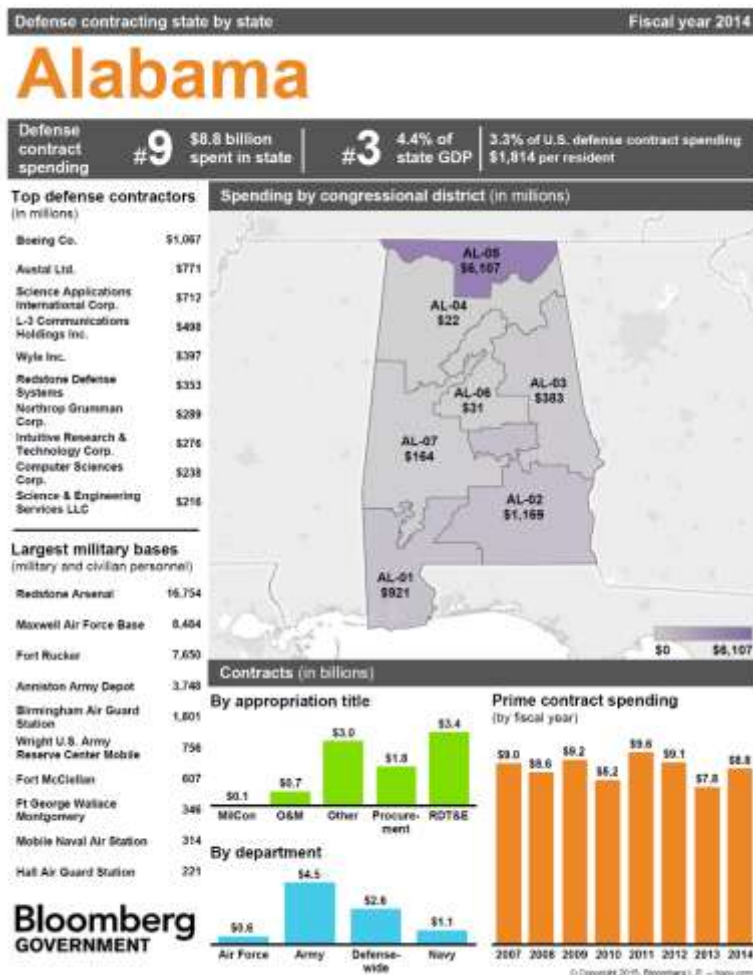

That \$8.8 billion was 4.4 percent of Alabama's 2014 gross domestic product (GDP), the third-highest percentage of any state in the nation.

Top defense contractors include aerospace giants, technology products- and services-focused companies and logistics suppliers.

Contracts are rolled up to parent companies using Bloomberg L.P.'s company database.

The largest military bases, including Coast Guard facilities, are listed by the number of military and civilian personnel as of Sept. 30, 2014.

BGOV corrected the names of many military bases to better indicate their current use.

Notes: MilCon - Military Construction, O&M - Operation and Maintenance, RDT&E - Research, Development, Test and Evaluation

Alabama's \$8.8 billion in defense contract dollars were 3.3 percent of all unclassified defense contract dollars in the 50 states and the District of Columbia, and represent \$1,814 per state resident.

On the map, defense contract dollars are shown by current congressional district. Districts with more spending are shaded a darker color. The range of the color scale changes for each state. Not all congressional districts are shown for every state.

The green bar chart shows spending by appropriation title.

The blue bar chart shows spending by military department. Spending for the Army Corps of Engineers is included in Army figures. Defense-wide includes spending by all other defense agencies.

The orange time-series bar chart shows how defense contract spending has changed in the state every fiscal year since 2007.

Contracts (in billions)

By appropriation title

By department

Prime contract spending (by fiscal year)

» ABOUT THE ANALYSTS

Robert Levinson is a senior defense analyst with Bloomberg Government. He is a retired lieutenant colonel in the United States Air Force. Prior to joining Bloomberg Government, Levinson worked for Booz Allen Hamilton as a strategic communications consultant. He has a bachelor's degree from the U.S. Air Force Academy and a master's from the University of California, San Diego. He is also a graduate of Harvard's program for Senior Executives in National and International Security.

Cameron Leuthy is a senior budget analyst with Bloomberg Government. He has more than 20 years of experience in analyzing budgets and legislation at the Office of Management and Budget, the Department of Defense, and at Booz Allen Hamilton. His expertise includes the federal budget and the nexus of national security policy, operational requirements and funding. He has a bachelor's degree from Western Washington University and an MPA from the University of Washington.

Kevin Brancato is Bloomberg Government's director of government contracts research. Before joining Bloomberg, he was a management scientist at the RAND Corporation, where he analyzed weapon system costs and defense manpower policies. He received a B.A. in math from Columbia University and a Ph.D. in economics from George Mason University.

The authors would like to offer special thanks to editorial intern Meredith Berger and quantitative analyst Nicholas RisCassi for their superb and tireless fact checking.
